

Fiber optic fusion splicer 38s

Overview

**The Fujikura 38S is designed for high-end FTTH **splicer applications in FTTX, Data Center / LAN and Access Networks. 38S offers an active V-Groove alignment single fibre splicer for reliable and improved splicing performance for a range of different fibres; SMF, MMF, DSF . The Fujikura 38S is a high-precision fiber optic fusion splicer designed for professional use. It ensures low splice loss and reliable connections, making it essential for fiber network installations. Compatible with accessories like the CT-50 and CT-08, it offers accurate alignment and durable. In Japan, we hold Fiber optic training where participants can systematically acquire knowledge and skills necessary for using fusion splicer, tools, and performing splicing work. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. They are indispensable in many. Model Number:FSM-38S Type:Fiber fusion splicer Brand Name:FSM-90S Place of Origin:Japan Use:FTTx Warranty Time:1 year Network:5 g, Wi-Fi, 4 G Port:None Power Source:None Connector Type:None Power – Minimum Receivable:None Frequency Range:None Splicing time:6 sec SM Fast Heating time:25 sec FP-03.
