

Fiber optic patch panel fjp

Article Overview

JPT Fiber Optic Patch Panels (FJP) are modular, high-density, 19-inch rack-compatible enclosures designed for scalable, reliable fiber management in data centers, FTTx, and telecom networks.

Overview

JPT FJP panels are engineered to provide flexible, high-density optical connectivity. They support MPO/MTP modules and are compatible with standard 19-inch racks, making them suitable for structured cabling systems in data centers, AI servers, and FTTx deployments. These panels are designed for easy installation, modular expansion, and high reliability, ensuring seamless performance for high-speed networks .

Key Features

- **Modular Design:** Panels can accommodate various MPO/MTP modules, allowing network operators to scale capacity without replacing the entire panel .
- **High-Density Cabling:** Supports dense fiber configurations, enabling efficient use of rack space while maintaining organized cable management .
- **Flexible Installation:** Compatible with both indoor and outdoor environments, and can integrate with pre-terminated pigtails or adapter packs for faster deployment .
- **Rack Compatibility:** Standard 19-inch rack mounting ensures easy integration into existing network infrastructure .
- **Scalability:** Designed to support network growth, allowing upgrades from lower-speed connections to high-speed 400G or beyond without major rework
