

Finland CIF price for integrated distribution cabinet 48V

Article Overview

The CIF price for a 48V integrated distribution cabinet to Finland is estimated around \$400-\$600 per unit, depending on specifications, supplier, and shipping terms.

Product Overview

Integrated distribution cabinets for 48V systems are modular units designed to connect, fuse, switch, and interface between DC system components, suitable for industrial, marine, or off-grid applications . They are typically customizable, with options for battery interfaces, outputs, switches, and relays. Finnish suppliers like SimplyDC provide modular plug-and-play systems, while manufacturers such as Insta and Valmet offer IEC- and UL-certified cabinets for demanding industrial environments .

CIF Pricing Considerations

CIF (Cost, Insurance, and Freight) includes the product cost, shipping to the destination port, and insurance coverage . For Finland, the CIF price will depend on:

- Base unit cost: Average import price for power distribution boxes is around \$398.70 per unit according to US import data . European suppliers may charge slightly higher due to certification and customization.
- Shipping and insurance: Sea freight from major ports in Europe or Asia to Finland typically adds \$50-\$150 per unit, depending on volume and insurance coverage....
