

Fireproof sealant for optical distribution boxes

Article Overview

Fireproof sealants for optical distribution boxes include intumescent inserts, acrylic or graphite sealants, and fire-resistant mortars designed to prevent fire and smoke spread through cable penetrations.

Types of Fireproof Sealants

1. Intumescent Inserts and Coatings

- Products like 3M™ Fire Barrier Electrical Box Inserts are flexible, one-piece intumescent inserts that expand when exposed to heat, filling the box and forming a char to prevent fire spread .
- These are suitable for metallic or plastic optical distribution boxes and can provide 1-2 hour fire resistance in wall assemblies.

2. Fire-Resistant Caulks and Sealants

- KBS® FR Caulking and Foamcoat HS are designed for sealing cable penetrations, including individual cables, bundles, and conduits .
- They are tested to DIN 4102-9, EN 1366-3, and approved under FM 4990, providing fire resistance up to EI120 depending on the system configuration.
- Walraven offers acrylic and graphite sealants for single cables up to 21 mm and small bundles up to 50 mm, ETA-approved and compliant with EN standards
