

Flame-retardant fiberglass cable tray specifications

Overview

Material of Side Member & Rung Corrosion Resistant Polyester-Isophthalic / vinyl ester, Flame Retardant U. Stabilized Resin System and Various types of Glass Fiber. Minimum Glass Content 55 to 60% in all pultruded sections and 30 to 40% for at sheets and other molded parts. FRP cable tray is the support system for managing cables and protect cables from heating, rains and corrosive elements. They are widely used in chemical plants, building con-structions and residential life by virtue of its. Sumip fiberglass cable tray incorporates a synthetic veil on the surface of all structural shapes which causes a resin rich layer which enhances corrosion protection. All fitting are pre fabricated & will be same specification as of straight trays.
