

French galvanized cable tray specifications

Article Overview

French galvanized cable trays are available in multiple widths and heights, with hot-dip or electro-galvanized finishes, compliant with European CE standards.

Dimensions and Types

French cable trays, such as those from OB Profils, are offered in widths ranging from 50 mm to 600 mm and heights from 25 mm to 100 mm, accommodating various cable loads and installation requirements . They are available in ladder, perforated, and solid-bottom designs, suitable for industrial, commercial, and outdoor environments.

Material and Finish

Galvanized cable trays are typically made from steel and finished with either hot-dip galvanization or electro-galvanization to enhance corrosion resistance . Other finishes include Sendzimir, Magnélis®, zinc-aluminum coatings, stainless steel, aluminum, epoxy, and anti-UV PVC, allowing selection based on environmental exposure and durability needs.

Accessories

A complete range of accessories is available, including supports, fittings, fasteners, screws, and brackets, ensuring secure installation and flexibility in routing cables
