

French manufacturer of high-voltage intelligent distribution boxes

Overview

To support these demands, HUBER+SUHNER delivers innovative modular distribution boxes engineered to adapt to the changing requirements of modern vehicle architectures. What is a high voltage box?

The High Voltage Power Box combines the functionality of an Onboard Charger (OBC), a DC/DC converter and a PDU (Power Distribution Unit). The OBC is the interface between the car and the public grid. It converts the energy from the network grid AC (Alternative Current). MARECHAL® junction, branch, and distribution boxes: reliable and secure solutions to optimize your professional electrical installations. Our industrial connectors and sockets can supply all types of boats (civilian and military) and heavy industry. The focus here is on solutions for manufacturers of mobile machinery. DC/DC Converters, also known as direct current (DC) voltage converters, are electronic devices that convert a DC voltage from one level to another.
