

Function of Intelligent Module in Distribution Box

Overview

At its core, an Intelligent Power Module (IPM) is an advanced integrated unit that houses everything needed to drive and protect power switching devices. Instead of sourcing three or four different chips, an IPM provides a "black box" solution that requires only a PWM signal from. The intelligent temporary power box is a product composed of IoT devices such as intelligent circuit breakers, intelligent sensors, and intelligent meters. It comprehensively utilizes big data, cloud computing, and mobile internet to build an intelligent temporary power box management platform. Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with maximum safety. Managing and installing a rack power distribution unit (PDU) has never been easier than with the EL2P PDU.
