

Function of New Explosion-proof Distribution Box

Overview

This explosion-proof distribution box is built for reliable protection in demanding industrial settings. They prevent sparks, arcs, or high temperatures generated by internal electrical components from coming into contact with explosive gases or dust in the surrounding atmosphere. Sparks or overloads can damage equipment and put people at risk. Downtime can also disrupt daily operations. Our control safety cabinet, socket, maintenance lighting, power supply switch, operation box. Flameproof enclosure (Ex db), which can be used as feed distribution equipment in control and distribution system (such as distribution box, switch box of main circuit, control box, terminal box or motor starting box etc.) Enclosure: 304 stainless steel, 316L stainless steel and Q235. These systems are widely used in chemical processing facilities, oil refineries, offshore platforms, oil tankers, and military-grade.
