

Function of Optical Cable Reel Well

Overview

Fiber optic cable reels are essential tools in the telecommunications and cable installation industries, designed to facilitate the handling, storage, and transportation of fiber optic cables. Readers who go through performance and technical specifications will be able to learn how and where best to utilize the cable reels in a target application. It is used with industrial jumpers, network cables, audio and video cables, and offers significant cost savings through direct cable integration into reel. OCC's Modular Advanced Reel System (MARS ®), the industry's first lightweight cable deployment reel system, is designed specifically for the demanding needs of harsh-environment fiber optic installations. Cable reel R-105 is designed for harsh environments. Great for sporting events, concerts and live broadcasts. 657A type bare fiber are available. Grandway bare fiber reel delivers a good macrobending performance in the industry while maintaining compatibility with current optical fibers, equipment, practices and procedures.
