

Georgian Passive Optical Networking Brand

Overview

FOPTNET operates at Georgian and Caucasus region telecommunications' markets since year 1996. Step into the future of passive optical networking with Precision OT. Through our extensive experience, Advanced Engineering team, and robust research and development department, we work directly with. Here is a preview of our showroom featuring the following products: ◦ Optical cables ◦ LAN cables ◦ Fiber. | Planet Fiber ☐☐ We continue to develop our Georgian branch and introduce Planet Fiber to local network. Long distance service is implemented via iterurban channels from Tbilisi towards Bolnisi, Gori, Khashuri. A passive optical network (PON) is a fiber-optic telecommunications network that uses only unpowered devices to carry signals, as opposed to electronic equipment. In practice, PONs are typically used for the last mile between Internet service providers (ISP) and their customers. In this use, a PON. This report presents a comprehensive overview of the Georgian passive networks market, the effect of recent high-impact world events on it, and a forecast for the market development in the medium term.
