

Harting Fiber Optic Adapter

Article Overview

Harting Fiber Optic Adapters provide robust, reliable connectivity with PushPull installation and durable metal or plastic housings suitable for demanding environments.

Overview

Harting fiber optic adapters are designed to ensure secure and high-performance optical connections in industrial, telecommunications, and data communication applications. They are compatible with various Harting connector types, including LC Duplex and multimode configurations, and are often integrated into Han® 3 A housings or PushPull metal receptacles for easy installation and maintenance .

Key Features

- **PushPull Mechanism:** Allows quick and secure mating and unmating of connectors without tools, reducing installation time and minimizing connection errors .
- **Durable Construction:** Available in metal or plastic housings, providing resistance to mechanical stress, temperature fluctuations, UV radiation, and ozone exposure .
- **Standards Compliance:** Many Harting adapters comply with RoHS, DNV GL, and IEC 61076-3-106, ensuring safety, environmental compliance, and interoperability .
- **Versatility:** Suitable for multimode and single-mode fiber applications, supporting high-speed data transmission and reliable signal integrity .
