

High-density anti-static flooring and cable trays low noise in stock

Article Overview

StaticWorx and Dawn Modular offer high-density anti-static flooring with low noise, while McMaster-Carr provides in-stock floor cable trays for safe, organized cable management.

Anti-Static Flooring Options

StaticWorx GroundSafe® ESD Flooring is a premium solution for mission-critical environments, offering permanent ESD protection, low static generation, and acoustic comfort. It supports heavy equipment, maintains stable resistance across wide humidity ranges, and integrates seamlessly with raised-access floors for underfloor cabling and utilities. The flooring is PVC-free, non-shedding, and chemically resistant, suitable for cleanrooms, labs, healthcare, and telecom facilities. Installation options include adhesive-free interlocking tiles and floating systems, allowing phased deployment without operational interruption . Dawn Modular Anti-Static Woodcore Raised Access Flooring features a high-density composite woodcore encapsulated in metal, providing durability, load-bearing capacity, and ESD control. The modular design allows underfloor space for cabling, data wiring, and HVAC systems, while the surface finish (HPL or vinyl) ensures electrostatic discharge protection. This system is ideal for data centers, server rooms, and technology-intensive workspaces . ShawContract Static Dissipative Flooring uses continuous conductive monofilaments to remove static buildup, offering kV ratings as low as 0.4 kV when grounded. It is effective for minimizing nuisance shocks and protecting sensitive electronics, with low noise and ergonomic underfoot comfort
