

Highway Fiber Optic Cable Splicing Team

Overview

Our highly-skilled team of professionals specialize in the installation, termination, splicing, and testing of fiber optics technology in virtually every possible environment, including permitting services and challenging right-of-way deployments. SpliceList connects project owners, carriers, and general contractors with certified cable splicing crews serving San Francisco and the surrounding California metro area. Important: We are not an internet provider. BICSI-certified fusion splicing, OS2 single-mode backbones, and certified test reports on every run. Our certified RCDD, Certified Network. As networks grow larger, denser, and more complex, fiber optic splicing becomes a critical path activity that directly impacts time-to-light, network reliability, and long-term operating costs.
