

# Hot Aisle for Data Center Micro-modules

## Overview

Hot aisle containment (HAC) takes advantage of the natural properties of warm air rising. The HAC can increase cooling efficiency by 30% or more. Huawei FusionModule2000 is a modular data center solution with smart modules, integrating power, cooling, and energy management to support efficient data center deployment. Ardmac have developed a range of Ground Supported (GS) and Ceiling Supported (CS) assemblies catering to an array of different modular clean rooms and off-site construction industry requirements including data centre design and data centre construction. The HAC. Armstrong aisle containment combines flexible design, strategic sourcing, and American manufacturing to deliver solutions that ensure long-term performance in a rapidly evolving digital world. Armstrong aisle containment solutions provide high-performance systems that support efficient, scalable. Rittal's new aisle containment line solves these problems with a modular, standards-based design that integrates easily with existing racks, cabling, HVAC, and safety systems. This cuts construction time, eases maintenance.
