

How much does a 12-core fusion single-mode fiber cost

Article Overview

A 12-core single-mode fiber cable typically costs between \$0.50 and \$1.50 per foot, depending on construction, jacket type, and application.

Cable Material Costs

For standard OS2 single-mode fiber, a 12-strand cable generally runs around \$0.50 per foot for bulk purchases, with retail prices potentially reaching \$1.50 per foot . Factors influencing the cost include:

- Cable construction: Tight-buffered, loose-tube, or armored cables affect material costs. Armored cables for harsh environments can add 20-50% to the base price .
- Jacket material: Indoor PVC or LSZH jackets are cheaper, while outdoor PE or UV-resistant jackets increase cost .
- Pre-terminated assemblies: Factory-terminated cables with connectors cost more than bulk cable due to labor and quality assurance .

Installation and Splicing Costs

If you plan to install and splice the cable, fusion splicing adds additional costs. Labor for a fusion splice typically ranges from \$50 to \$150 per splice, and a 12-core cable requires 12 splices per closure . Equipment like fusion splicers and OTDR testers may also be required, with splicers costing \$3,000-\$15,000 depending on features
