

How much does an Austrian switch distribution box cost

Article Overview

The cost of a switch distribution box in Austria typically ranges from €200 for basic residential units to over €5,000 for customized industrial or high-voltage systems.

Residential and Small Commercial Units

Standard residential distribution boxes, often single-phase or small three-phase units, generally cost €200–€800, depending on the number of circuits, amperage capacity, and material quality . These units may include basic safety features such as fuses, circuit breakers, and protective enclosures. Installation and compliance with Austrian electrical standards (ÖVE/ÖNORM) can add €100–€300 to the total cost .

Industrial and High-Capacity Units

For industrial or commercial applications, distribution boxes are larger, often three-phase, and may include advanced features like smart monitoring, remote control, and integration with building management systems. Prices for these units typically range from €1,000 to €5,000 or more, depending on customization, voltage rating, and environmental protection (e.g., IP-rated enclosures for outdoor use), . Companies like RHG GmbH and Lorünser Austria GmbH provide tailor-made solutions, which can further increase costs due to project-specific engineering and testing .
