

How much does one meter of 32-core single-mode fiber cost

Article Overview

The estimated cost of one meter of 32-core single-mode fiber optic cable ranges from approximately \$1.50 to \$3.50 per meter, depending on construction and specifications.

Price Overview

Single-mode fiber (OS2) is generally less expensive than multimode fiber, with prices influenced by fiber count, jacket type, and environmental rating. For standard indoor or outdoor single-mode cables:

- Base price per meter: \$0.65–\$2.60 for standard indoor runs with simple routing .
- Higher-end or armored cables: \$3.00–\$5.00 per meter for outdoor, armored, or gel-filled variants .
- Bulk or wholesale purchases: Single-mode fiber typically costs \$0.10–\$0.50 per foot (\$0.33–\$1.64 per meter) for lower core counts, with higher core counts proportionally increasing the price . For a 32-core cable, the price is higher than a 12-core but lower than a 48-core or 96-core cable. Based on industry pricing trends, a reasonable estimate is \$1.50–\$3.50 per meter, depending on whether the cable is armored, LSZH-rated, or designed for outdoor use .

Factors Affecting Cost

- Cable Construction: Loose-tube, tight-buffered, armored, or non-armored designs affect material and production costs. Armored cables can add 20–50% to the base p...
