

How much does professional galvanized cable tray cost

Article Overview

Galvanized cable trays in the UK typically range from £10 to £150 per meter depending on type, size, and finish.

Price Overview

Light-duty galvanized trays are generally the most affordable, suitable for smaller cable loads and internal installations. Prices typically start around £10–£25 per meter for pre-galvanized steel options. Medium-duty trays are designed for heavier cable loads and may include pre-galvanized or hot-dipped finishes for corrosion protection. These usually cost £25–£60 per meter, with accessories like couplers, bends, and lids sold separately. Heavy-duty trays, often used in industrial or outdoor environments, are hot-dipped galvanized for maximum durability. Prices can range from £60–£150 per meter, depending on width (50mm–600mm) and length (1m or 3m) options.

Factors Affecting Cost

- **Material and Finish:** Hot-dipped galvanized trays are more expensive than pre-galvanized due to superior corrosion resistance.
- **Tray Type:** Ladder, wire mesh, basket, and single rail designs vary in price, with ladder and heavy-duty trays generally costing more.
- **Width and Length:** Wider and longer trays increase material costs. Standard lengths are 1m and 3m, with widths from 50mm to 600mm.
- **Accessories:** Couplers, bends, tees, crossovers, and lids are sold separately and can add £5–£30 per piece depending on size and finish
