

How much does wire mesh cable tray management cable cost per meter

Article Overview

A reasonable price for installing wire mesh cable trays typically ranges from \$15 to \$50 per meter, depending on material, installation complexity, and project conditions.

Material Costs

Wire mesh cable trays, also known as basket trays, are among the most affordable types of cable trays. Their price per meter generally ranges from \$2 to \$25, depending on the material and finish used. Common materials include:

- Pre-Galvanized Steel (PG): Most affordable, suitable for dry indoor environments like offices or schools .
- Hot-Dip Galvanized Steel (HDG): More expensive, ideal for outdoor or industrial areas due to superior corrosion resistance .
- Aluminum: Lightweight and corrosion-resistant, typically costing more than steel, often used in coastal or industrial environments .
- Stainless Steel: Highest cost, used in highly hygienic or corrosive environments such as food plants or offshore facilities . Wire mesh trays are cheaper than ladder or solid-bottom trays and are ideal for lightweight cabling, such as data or communication lines .
