

How to bundle optical cables and their prices

Article Overview

Bundled optical cables typically range from \$0.05 to \$6 per foot depending on fiber type, strand count, construction, and customization.

General Pricing Overview

The cost of bundled optical cables varies widely based on several factors:

- **Fiber Type:** Single-mode fiber (OS1/OS2) is generally less expensive than multimode fiber (OM3/OM4), with single-mode cables ranging from \$0.10 to \$0.50 per foot and multimode from \$0.30 to \$1.00 per foot for standard configurations .
- **Strand Count:** Higher fiber counts increase cost proportionally. For example, a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .
- **Cable Construction:** Indoor riser-rated cables are cheaper than plenum-rated or armored cables. Armored or direct-burial cables suitable for harsh environments can range from \$0.50 to \$5 per foot .
- **Bundled Assemblies:** Pre-terminated or multi-fiber assemblies with custom connectors, splitters, or protective jackets can significantly increase cost. Custom assemblies with specialized fibers (e.g., polarization-maintaining, erbium-doped, or fluoride fibers) and advanced coatings may require individual quotes .
- **Length and Volume:** Bulk purchases (e.g., >10 km) often reduce per-unit cost, while custom-cut lengths or urgent orders may increase it
