

How to connect a Wo27s with a China Unicom fiber optic cable to a router

Article Overview

To connect your Wo27s to a China Unicom fiber optic line, you must first use an Optical Network Terminal (ONT) to convert the fiber signal, then link it to your router via Ethernet.

Step 1: Prepare Your Equipment

- Optical Network Terminal (ONT): Provided by China Unicom, this device converts the incoming fiber optic signal into an electrical signal your router can use .
- Fiber optic cable: Usually a thin yellow cable with SC/APC or SC/UPC connectors .
- Router (Wo27s): Ensure it has a WAN or Internet port compatible with Ethernet input .
- Ethernet cable: Cat6a or higher is recommended for optimal speeds .

Step 2: Connect the Fiber to the ONT

- Locate the fiber wall outlet where China Unicom's fiber enters your home.
- Remove protective caps from both the fiber cable and the ONT's optical port.
- Carefully insert the fiber connector into the ONT's optical input port, aligning the key or tab until it clicks securely .
- Power on the ONT and wait 2-5 minutes for the status lights to stabilize. A solid green PON or Optical light indicates a successful connection .

Step 3: Connect the ONT to Your Router

- Use an Ethernet cable to connect the ONT's LAN/Ethernet output port to the WAN/...
