

How to connect the fiber optic cable connector

Article Overview

Connecting a fiber optic cable connector requires careful preparation, precise alignment, and proper testing to ensure a low-loss, reliable connection.

Tools and Materials Needed

- Fiber optic cable and compatible connector (LC, SC, ST, FC, etc.)
- Fiber strippers and cleaver for precise cutting
- Crimping pliers or threaded mechanisms depending on connector type
- UV glue or epoxy and a UV lamp (for adhesive connectors)
- Cleaning supplies: anhydrous alcohol, fiber cleaning rods, and dust covers
- Safety equipment: gloves and safety glasses to protect against glass shards

Step-by-Step Connection Process

- Prepare the Fiber
 - Strip the outer jacket carefully to expose the fiber without nicking it.
 - Inspect the fiber for damage, kinks, or bends, and clean the end with alcohol and fiber cleaning rods .
- Insert Connector Components
 - Slide the connector boot and any ferrule or spring components onto the fiber.
 - For adhesive connectors, inject UV glue into the ferrule and insert the fiber until glue overflows slightly, then cure with a UV lamp
