

How to connect the meter splitter and switch

Overview

Connect the IN port of the splitter to the smart meter's P1 cable/port. Plug your P1 devices (EV charger, Home Assistant gateway, Wi-Fi P1 dongle, thermostat, etc. Unlike cheap passive Y-cables, this active splitter buffers, amplifies and galvanically isolates each output (optocouplers per port), so up to four devices can communicate with your DSMR. The P1 splitter has 1 P1 signal input and 3 P1 signal outputs. It blinks white when receiving data. The P1 data out ports connect to P1. The P1 Splitter is a practical solution that allows you to connect multiple devices to the P1 port of your smart meter, such as a P1 dongle, HomeWizard, Tibber Pulse, Sparkee, SmartStuff P1 Dongle or energy management system. co In this video, we're installing a 200 amp meter combo with breakers using a 4-wire setup. This approach brings the main disconnect outside for firefighter access and treats the interior panel as a subpanel.
