

How to convert a single-mode fiber optic cable to an Ethernet port

Overview

A media converter is a simple device that sits between the fiber optic cable and the Ethernet cable. (LC, SC) matches the port. Ethernet ports are designed for copper cables (like Cat5e or Cat6), which transmit data using electrical signals. In most cases, it converts Ethernet (copper) signals to fiber-optic signals (and vice versa). This conversion helps to extend network distances beyond the limits of traditional copper. Learn why IT Pros trust StarTech.com for performance connectivity accessories.), well beyond the 100 m (328-ft. Extends Power and Data to a PoE+ Device up to 20 Kilometers via SC Singlemode Fiber Cable This economical unit converts a singlemode fiber optical signal to. I'm looking for either a network interface card (PCIe) or media convertor (or other solution) to go from a fiber optic single-mode simplex cable with an SC/APC connector to an RJ-45 Gigabit Ethernet to be used inside a home.
