

How to disconnect the power supply from the distribution box

Article Overview

To safely disconnect a power distribution box, first turn off the main power supply, verify no voltage is present, and then remove or switch off the circuit breakers or disconnect switches.

Safety Precautions

Before attempting to disconnect a distribution box, ensure your safety by following these steps:

- Turn off all connected appliances to prevent damage from sudden power loss .
- Wear personal protective equipment such as insulated gloves, safety goggles, and rubber-soled shoes .
- Use a voltage tester or multimeter to confirm that no electricity is present in the circuits .
- If the distribution box contains high voltage, consider having a qualified electrician perform the operation .

Step-by-Step Procedure

- Locate the main breaker or disconnect switch: This is usually near the electric meter or at the top of the distribution panel .
- Turn off the main breaker: Flip the lever switch to the "off" position to cut power to the entire panel .
- Verify power is off: Use a non-contact voltage meter to ensure no current is flowin...
