

Dimensions:

Technical drawing showing the dimensions of the 1000 Series High Pressure Cell. The drawing includes a side view and a cross-sectional view. Key dimensions are labeled in millimeters (mm):

- Outer diameter: 60.5
- Length: 20.9
- Inner diameter: 6.5
- Internal diameters: 6.5, 19, 10.0, 19, 6.5, 7.95, 0.2, 110, 1.10
- Internal length: 200±30
- Internal diameter: 19
- Internal diameter: 10.0
- Internal diameter: 19
- Internal diameter: 6.5
- Internal diameter: 7.95
- Internal diameter: 0.2
- Internal diameter: 110
- Internal diameter: 1.10

Inspecting a power distribution box involves a combination of safety precautions, visual checks, component testing, cleaning, and documentation to ensure safe and efficient operation.

Before starting any inspection, ensure all power sources are properly isolated and wear appropriate personal protective equipment (PPE) such as insulated gloves, safety glasses, and flame-resistant clothing. Never attempt to inspect live components unless you are trained and authorized, as electrical panels can cause fatal shocks or burns.

- Check the enclosure for dust, debris, rust, or signs of corrosion .
- Inspect circuit breakers and fuses for proper operation, signs of overheating, discoloration, or damage .
- Examine bus bars and connections for loose or corroded terminals; torque-test bolted connections to manufacturer specifications .
- Verify indicators and lights on meters, surge protection devices, and electronic trip units are functioning .
- Look for environmental damage such as water ingress, paint deterioration, or physical deformation
