

How to inspect the electrical distribution box on a construction site

Article Overview

Inspecting a distribution box involves checking its physical condition, wiring, grounding, circuit protection, labeling, and environmental safety to ensure compliance and prevent hazards.

Preparation and Safety

Before starting the inspection, ensure the following:

- Power isolation: Confirm the DB is de-energized if possible, or follow strict live inspection protocols.
- Personal protective equipment (PPE): Wear insulated gloves, safety glasses, and protective footwear.
- Documentation: Have the DB drawings, circuit schedules, and previous inspection records ready for reference .

Physical Condition Check

- Inspect the DB enclosure for mechanical damage, corrosion, or loose doors and seals.
- Verify that holding arrangements and mounting are secure as per manufacturer specifications.
- Ensure cleanliness inside the DB; remove dust, debris, or moisture
