

How to install a concealed distribution box

Article Overview

Concealed distribution boxes should be installed in a dry, accessible location with secure mounting, proper wiring, and full compliance with safety standards.

Site Selection

Choose a location close to the main power supply to minimize power loss and ensure safety. Avoid humid, corrosive, or poorly ventilated areas to prevent equipment damage and overheating. The site should allow easy access for inspection and maintenance while remaining discreet within walls or partitions .

Mounting and Fixing

The bottom edge of the distribution box is typically installed 1.5 to 1.8 meters above the floor for convenient operation. Use a firm and reliable fixing method, such as mounting brackets or screws, to prevent movement or tilting due to vibration or accidental impact. Ensure the box is flush with the finished wall surface to allow proper cover installation and prevent fire spread .

Wiring Specifications

- Power Off: Always turn off the main power before wiring.
- Wire Selection: Use high-temperature resistant copper wires with cross-sectional areas suitable for the load current....
