

How to make network cabinet cable ties look neat

Overview

The best way to organize cables under desk is by using cable trays, adhesive clips, or zip ties to keep everything neatly secured. Effective solutions for messy cable management can also include under-desk cable sleeves or dedicated cable channels to prevent clutter and hazards. Invest in cable storage boxes and label each cord for easy identification. It honestly pays dividends for anyone to keep a pack of Velcro or plastic ties in their home, and not just for cables, but they really shine here. Admittedly, using these types of ties is best for cables that are not often changed out. Much more than just a neat and professional appearance, better cable management offers a safe and easy way to maintain and service a network.
