

How to use a USB KVM switch

Article Overview

A USB KVM switch allows you to control multiple computers using a single keyboard, monitor, and mouse by connecting each computer to the switch and switching between them via buttons or hotkeys.

Step 1: Choose the Right KVM Switch

Select a KVM switch compatible with your computers' ports (USB-A, USB-C, HDMI, DisplayPort, etc.) and operating systems. Consider the number of computers you want to connect, the type of peripherals, and the distance between devices to ensure proper cable length and signal quality .

Step 2: Gather Equipment

Prepare all necessary cables, adapters, and hubs. Ensure your monitor, keyboard, and mouse are compatible with the KVM switch. If your devices use different connector types, you may need adapters or docking stations .

Step 3: Connect Peripherals to the KVM Switch

Plug your keyboard, mouse, and monitor into the designated USB and video ports on the KVM switch. If your switch supports additional devices like speakers or webcams, connect them to the appropriate ports .

Step 4: Connect Computers to the KVM Switch...
