

# How to view relay protection setting sheets

## Article Overview

You can view a relay protection setting sheet using Excel or similar spreadsheet software, which lists all relay parameters, pickup currents, time multiplier settings, and curve types for protection coordination.

### Accessing the Sheet

Relay protection setting sheets are typically maintained in Excel, Google Sheets, or LibreOffice Calc. You can download structured templates, such as the free relay settings record from ECalPro, which includes columns for Relay Tag, Make & Model, Location, Protected Equipment, Rated Current, CT Ratio, Pickup (Is), TMS, Curve Type, Highset Setting, Definite Time Setting, Last Test Date, and Engineer Sign-off . These sheets follow IEC 60255 relay parameter conventions, making them standardized for protection studies.

### Understanding Key Parameters

- Pickup Current (Is): The threshold current at which the relay will operate .
- Time Multiplier Setting (TMS): Adjusts the operating time of the relay to coordinate with other relays .
- Curve Type: Defines the inverse time characteristic (Standard Inverse, Very Inverse, Extremely Inverse, Long Time Inverse) used for fault clearance .
- Highset and Definite Time Settings: Used for instantaneous or definite-time tripping for severe faults ....
