

Huawei 10 Gigabit Multimode Optical Module 850nm

Overview

The Huawei SFP 10G SR MP 02313AMY is a high performance 10GBase SR Optical Transceiver designed for use in SFP+ slots. This module is specifically engineered for multi mode fiber applications and operates at a wavelength of 850nm. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Single-fiber bidirectional (BIDI) optical modules must be used in pairs. For. Huawei ESFP-GE-SX-MM850 eSFP 1GE 850nm multi-mode 0. Check stock, request quote, download datasheet. 02318169 10GBASE-SR SFP+ transceiver with LC Duplex connection according to MSA standards compatible with Huawei from the BlueOptics brand. 55km, LC) is factory new with original packaging. Table 1 show the quick specification.
