

Hungarian Multimode Fiber Attenuator

Overview

Useful in all networks including WDM and EDFA system applications with high-power laser sources, these single-mode and multimode fiber attenuators are manufactured using doped fiber, provide maximum stability and low PDL, and are compliant with Bellcore standards. FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission. It maintains the beam profile of signals that comply with the encircled flux conditions. Thorlabs has a wide variety of single mode (SM), polarization-maintaining (PM), or multimode (MM) fixed and variable optical attenuators (VOAs). We offer SM and PM electronic VOAs that provide control of the output power with FC/PC or FC/APC connectors. The clear aperture is Ø 5 mm. for achieving a suitable signal level for a data receiver in a telecom system.
