

Indonesia Unicom Fiber Optic Wireless Router Network Cable Interface

Article Overview

Unicom in Indonesia provides fiber optic networks with routers supporting 10/100Base-T Ethernet interfaces for LAN and WAN connections, compatible with DSL and cable modems.

Unicom Fiber Optic Network in Indonesia

Unicom Muda Utama operates a fiber optic network across Java, Bali, and Sumatera, covering approximately 13,081 km of fiber optic infrastructure . Their network supports backhaul, last-mile connections, and direct customer access, ensuring high-speed internet delivery. The fiber network is designed for both residential and business clients, offering leased cores, leased bandwidth, and local loop services . The infrastructure is built to maintain high reliability and service quality, with professional human resources managing installation and maintenance.

Wireless Router and Network Cable Interface

Unicom's 802.11g wireless routers provide multi-function connectivity for fiber optic users . Key features include:

- LAN Ports: 4-port switching hub supporting 10Base-T and 100Base-T Ethernet connections, allowing wired devices to connect directly to the router.
- WAN Port: 10/100Base-T Ethernet port for connecting to a DSL or cable modem, supporting both dynamic and fixed IP addresses....
