

Industrial Level 3 Distribution Box Protection

Overview

Install the Level 3 surge protection device inside the equipment or at the equipment's power supply input, especially for critical or sensitive electronic devices. Technical Requirements Maximum discharge capacity: 20kA per phase or lower. Voltage protection level: $\leq 1800V$. Distribution boxes protect our electrical systems like bodyguards shield VIPs. When they fail, everything goes dark. Today, we'll explore how international standards translate into practical protection through rigorous testing methodologies that simulate the harshest conditions on earth. Adequate system designs allow for the system to withstand and isolate faults while not causing additional damage and/or outages. System. Manufacture custom made Local Control Stations & Distribution Boxes, local control panel boards and stations, explosion protected control units, distribution boxes, grounding control device, motor starters, motor switches, made stainless steel AISI 316L or AISI 304L. Control devices and control. (1) Waterproof distribution box engineered for harsh outdoor and industrial environments, providing IP65–IP68 sealing against dust, rain, and UV.
