

Installation Method of Front Cable Management Rack for Server Rack

Article Overview

To install a front cable management rack, select the appropriate bracket for your rack depth, align it with the rack flanges, and secure it using screws through the designated EIA unit holes.

Step-by-Step Installation

1. Choose the Correct Bracket

- Most systems include two cable management bars: a wider bar for shorter-depth racks and a shorter bar for deeper racks .
- Ensure the bracket matches your rack depth to allow proper cable routing.
- 2. Mark Screw Locations
 - Each bracket typically occupies three EIA units.
 - Hold the bracket against the rack flange and mark the screw positions on the inside of the rack flange using a sticker or pen .
- 3. Assemble the Bracket
 - Attach the cable management bar to the bracket using the provided screws (usually M3 screws) before mounting it to the rack .
- 4. Attach the Bracket to the Rack
 - Position one side of the assembled bracket against the rack flange, aligning it with the marked locations.
 - From inside the rack, insert three screws through the rack flange into the bracket.
 - Repeat for the opposite side .
- 5. Adjust the Bracket
 - Use thumbscrews or adjustable mechanisms to tilt or reposition the bracket as needed for optimal cable routing .
- 6. Organize Cables...
