

Installation of China Telecom Fiber Optic Router

Article Overview

To connect a China Telecom fiber optic router, you need to link the fiber line to the Optical Network Terminal (ONT) and then connect the ONT to your router via Ethernet, followed by configuring the router with your ISP credentials.

Required Equipment

- Optical Network Terminal (ONT): Provided by China Telecom, converts fiber signals into electrical signals compatible with your router .
- Fiber optic cable: Usually single-mode with SC/APC connectors .
- Ethernet cable: To connect the ONT to the router's WAN port .
- China Telecom-compatible router: Ensure it supports gigabit speeds and fiber input .

Step-by-Step Connection

- Locate the fiber wall outlet: This is where China Telecom's fiber line enters your home.
- Connect the fiber cable to the ONT: Remove protective caps, align the connector, and insert it into the ONT's optical port until it clicks securely .
- Power on the ONT: Plug in the power adapter and wait 2-5 minutes for the status lights to stabilize .
- Connect the ONT to the router: Use an Ethernet cable from the ONT's LAN/Ethernet port to the router's WAN port .
- Power on the router: Wait for the indicator lights to confirm a successful connectio...
