

Installation of PZ30 type distribution box

Article Overview

Installing a PZ30 distribution box involves careful planning, secure wall mounting, proper wiring, and testing to ensure safe and reliable electrical distribution.

Step 1: Plan the Installation Location

Choose a location that is easily accessible, away from water sources, high-traffic areas, or heat sources. Ensure the wall can support the weight of the box and that there is enough space for wiring and future maintenance ().

Step 2: Prepare the Wall

- Mark the positions for the mounting screws using the box as a template.
- Drill holes for wall anchors or screws, depending on the wall type.
- Ensure the mounting points align with the box's pre-marked fixing positions ().

Step 3: Mount the Box

- Use the provided screws and wall anchors to secure the box firmly to the wall.
- For surface-mounted boxes, ensure it sits flush and level.
- Confirm that the box is stable and does not wobble ().

Step 4: Prepare Internal Components

- Install DIN rails if not pre-installed.
- Attach bus bars, neutral bars, and earthing terminals as required....
