

Installation of Photovoltaic Trough Cable Trays

Overview

Before starting the installation of troughs, make sure that you have:

- 100x35mm vertical cable trays for cable routing from the roof
- 150x35mm horizontal troughs for cable routing between panels
- Wood screws 4x30mm for fixing troughs
- Yellow green cable LGY 16mm² for.

Before starting the installation of troughs, make sure that you have:

- 100x35mm vertical cable trays for cable routing from the roof
- 150x35mm horizontal troughs for cable routing between panels
- Wood screws 4x30mm for fixing troughs
- Yellow green cable LGY 16mm² for.

The eTile system requires the correct routing of cables under the roof slab. Steel cable trays ensure safe wiring and are an important element of the grounding system of the entire installation. Made of corrosion-resistant materials (e. Only in this long way, we are able to develop all the necessary knowledge and experience to apply this into the market as a quality service with hard cable containment. We are able to offer sustainable services for our customers across all the with hard wo tes salgan ganando. Cable tray management comprises the number of cables and cable trays and how to effectively manage and distribute these. ii Individual structures are made for an individual order with 4 week production period. Universal structures are currently in stock and available on hand.
