

Installation of concealed wiring main distribution box

Article Overview

A concealed wiring main distribution box is a flush-mounted electrical enclosure designed to safely house circuit breakers, RCDs, and related components while blending seamlessly into walls.

Overview

A concealed distribution box is installed recessed into walls or ceilings, leaving only the front panel visible. This design ensures a clean, tamper-free appearance while providing secure access to electrical circuits for homes, offices, shops, and industrial setups . It is ideal for modern electrical systems, including solar inverter setups and low-voltage control systems .

Key Features

- **Material and Construction:** Typically made from powder-coated steel, stainless steel, or flame-retardant ABS plastic for durability, corrosion resistance, and fire safety .
- **IP Rating:** Commonly rated IP40 to IP54, providing protection against dust and accidental contact, with higher ratings (IP65) available for damp or industrial environments .
- **Capacity and Size:** Available in various sizes, such as 10×14 inches or 12-way configurations, accommodating multiple MCBs, RCDs, and wiring without clutter .
- **DIN-Rail Compatibility:** Standardized DIN rails allow easy installation of most local...
