

[illegible]

Intelligent constant temperature cabinets provide reliable, energy-efficient, and environmentally protected solutions for urban communication networks, ensuring stable operation of critical equipment in Safe City applications.

Intelligent constant temperature cabinets are specialized enclosures designed to maintain stable internal temperatures for sensitive communication and power equipment, even under extreme environmental conditions. They are widely used in Safe City communication networks, including surveillance, traffic management, emergency response, and edge computing nodes, where uninterrupted operation is critical (). These cabinets integrate temperature control, environmental monitoring, and remote management to ensure equipment reliability and longevity.

- **Temperature Control:** Combines air conditioning, heat exchange, and heat pipe technologies to maintain a constant internal temperature. Some designs use ventilation openings with baffle mechanisms to optimize cooling efficiency depending on external temperature ().
- **Environmental Protection:** Fully sealed or dustproof and waterproof designs meet high protection standards (IP and IK ratings), safeguarding equipment from rain, dust, and physical impacts ()....
