

Intelligent Solution for Power Supply Systems at Telecom Sites in Nepal

Overview

The new Site Energy Orchestration solution from Ericsson acts as an intelligent bridge between the radio access network (RAN) and power grids, optimizing operations to boost energy cost savings, reduce carbon footprint and open new revenue streams. Nepal's leading telecom operator Ntc uses various power equipment to keep its services running throughout the country. For this, it manages its power operation from the Power. REDtone adopts Huawei iSolar solution to build 100% PV-powered rural sites. The new solution enables sites to reduce the use of gensets and manual O&M, improves the reliability of site power supply. Turkcell and Huawei realize the importance of long-term commitments to climate action to win the. Huawei has integrated information and interconnection technologies with power electronics to create the Smart Site Solution — a solution that digitalizes and interconnects intelligent network facilities. The solution incorporates a Software-Defined Power (SDP) architecture that enables you to. We Supply difficult to find Products of Electrical & Telecom sectors. we deal in various cables and transmission line Parts, optical fiber cable networking components. our major supply sector are: Telecom,ISP Company, Electrical. Since 2009, we have been at the forefront of Nepal's energy transition — delivering reliable, sustainable, and innovative solutions that power communities, businesses, and government institutions. kindly contact us for above requirment.
