

International Power and Energy Internet

Article Overview

The International Power and Energy Internet encompasses global research, conferences, and collaborations focused on smart grids, energy internet technologies, and advanced power systems.

Key Conferences and Symposia

- ITPES 2026 (International Symposium on Intelligent Technology for Power and Energy Systems) Scheduled for October 19-21, 2026, in Glasgow, UK, ITPES 2026 highlights cutting-edge research in power and energy systems. The symposium features keynote speeches, paper presentations, and industry sessions. Accepted papers are published in Springer's Lecture Notes in Networks and Systems series and indexed in EI-Compendex and Scopus, providing a platform for global academic and professional exchange .
- ICPET 2026 (International Conference on Power and Energy Technology) Held in Chengdu, China, from July 28-31, 2026, ICPET 2026 focuses on renewable energy, smart grids, energy storage, and digitalized power systems. The conference promotes collaboration between academia and industry, with special sessions on microgrid resilience, integrated transportation-power systems, and urban power grid morphology .
- ICEIPS 2026 (International Conference on Energy Internet and Power Systems) This conference emphasizes the integration of energy internet technologies with power systems. Previous editions in Beijing showcased research on microgrid operation, high-voltage power devices, and sustainable energy solutions under high renewable penetration .
- SPIES 2026 (International Conference on Smart Power & Internet Energy Systems) Scheduled for September 28-30, 2026, in Sunshine Coast, Australia, SPIES 2026 ad...
