

Introduction to Asian Cable Tray Materials

Overview

The four primary materials—galvanized steel, stainless steel, aluminum, and FRP (Fiber Reinforced Plastic/GRP)—each serve distinct market segments with different cost structures, performance characteristics, and certification requirements. The performance and quality of cable trays directly impact cable safety and service life. This comprehensive guide analyzes cable. Cable trays include cable trunking, cable ladder, perforated cable tray, wire mesh cable tray and the matching accessories, etc, which are often made with such materials as hot dip galvanized steel, galvanized sheet, stainless steel, aluminum alloy, Polyvinyl chloridere (PVC) or fiberglass, etc. Common. Cable support systems have been installed in almost every facet of industry from simple installations supporting cables around a factory wall to major projects such as power stations, oil refineries, aluminium smelters, coal loaders, petro-chemical refineries, grain terminals, major commercial. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation.
