

Iraq Cross-Street Fiber Optic Cable

Overview

The Silk Route Transit is a fibre-optic terrestrial cable across Iraq, over 3500 kilometres. It is owned and operated by iQ Group, a leading Iraqi fiber optic provider founded in 2005. As a transit hub, Iraq will be able to link all the neighbouring countries to the global fibre optic network and act as the path of least resistance between Europe and Asia, fulfilling a long. Iraq's participation in the Gulf Fiber Optic (FIG) submarine cable landing project is an important step in this direction, as part of the agreement between the Ooredoo Group and the Iraqi Telecommunications and Postal Company (ITPC). This fiber optic cable, expected to be completed in 2027, will. By mid-2025, Iraq quietly crossed a historic threshold: more than 1 terabit per second (Tbps) of terrestrial internet transit is now flowing through its territory. Iraq is fast emerging as a strategic internet. Iraq's National Investment Commission (NIC) has announced a new strategic vision aimed at delivering major projects to support Iraq's economy and sustainable development. The plan was presented during a meeting attended by members of parliament from the Reconstruction and Development bloc, where. 6Wresearch actively monitors the Iraq Fiber Optics Cable Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook.
