

Ireland LPO optical module QSFP-DD

Article Overview

QSFP-DD LPO modules deliver high-bandwidth, low-latency PCIe Gen 5.0 optical connectivity, ideal for AI/ML and high-performance data center applications.

Overview

QSFP-DD (Quad Small Form-Factor Pluggable Double Density) LPO modules are 8-lane optical transceivers designed to support ultra-high-speed data communication, including 400G and beyond, while maintaining a compact form factor and backward compatibility with legacy QSFP modules . The LPO variant specifically enables PCIe Gen 5.0 over optical links, providing low-latency, high-bandwidth connections suitable for rack-to-rack interconnects and server disaggregation .

Key Features

- **High Bandwidth & Low Latency:** Supports PCIe Gen 5.0 with 8 full-duplex channels, enabling fast data transfer for AI/ML workloads .
- **Compact Form Factor:** Maintains the same footprint as traditional QSFP modules while doubling the lane density, allowing higher port density on switches and routers .
- **Thermal Efficiency:** Optimized for heat dissipation, with modules consuming less than 5W for typical LPO transceivers, and host systems can further manage thermal performance with heatsinks or airflow optimization .
- **Backward Compatibility:** QSFP-DD ports can accept older QSFP modules, allowing gradual network upgrades without replacing existing infrastructure .
- **Reach & Connectivity:** Typical LPO modules support distances up to 50 meters ov...
