

JP Integrated Distribution Box Components

Overview

The JP-type JP cabinet consists of a cabinet body, an open-type knife switch (isolator), plastic-enclosed circuit breakers, fuses, residual current protective circuit breakers, composite switches, an intelligent reactive power compensation controller, power capacitors . The JP-type JP cabinet consists of a cabinet body, an open-type knife switch (isolator), plastic-enclosed circuit breakers, fuses, residual current protective circuit breakers, composite switches, an intelligent reactive power compensation controller, power capacitors . JP series outdoor integrated power distribution box is an outdoor integrated power distribution device integrating metering, outgoing line, reactive power compensation and other functions. It has the functions of short circuit, overload, overvoltage, leakage protection, small size, beautiful. The JP-series outdoor integrated distribution box is a comprehensive outdoor power distribution device that integrates multiple functions, including metering, outgoing circuits, and reactive power compensation.
