

Kazakhstan Energy Internet Pilot Project

Overview

Energy Minister Yerlan Akkenzhenov announced the initiative during a recent government meeting. EnergyTech will consolidate all elements of the sector, including power generation, subsoil use, refining, and coal, on a single platform aligned with QazTech standards. He noted that, in general, the country's energy system operates normally, in parallel with the energy systems of the Russian Federation. Kazakhstan currently operates 230 power plants, including 156 renewable energy facilities with a combined installed capacity of over 3 gigawatts. In 2024, the country generated 117.9bn kWh—highlighting the growing need for. Kazakhstan is moving forward with plans to establish EnergyTech, a unified national digital platform for managing its fuel and energy complex. In particular, a pilot project has been launched for digital monitoring of the licensing and. Deputy Prime Minister of Kazakhstan Kanat Bozumbayev announced the start of the practical development of the utilities and energy sectors' modernization national project, including the attraction of investments, pilot projects and digitalization of processes, Kazinform News Agency reports.
