

Kyrgyzstan procures large-core optical fiber ADSS

Article Overview

Kyrgyzstan, through Kyrgyztelecom, has procured 110,000 meters of advanced fiber-optic cable, including large-core ADSS types, to expand its national telecommunications infrastructure.

Procurement Details

OJSC Kyrgyztelecom signed a contract with Global Optical Communication Uzbekistan LLC for the supply of 110,000 meters of fiber-optic cable, including 70,000 meters of modular-stranding cable reinforced with glass strands, suitable for ADSS deployment . The total contract value is \$31,880, with delivery scheduled within 45 calendar days to Kyrgyztelecom's warehouse in Bishkek . Alongside the supply agreement, a memorandum of cooperation was signed to foster long-term collaboration, technology exchange, and modernization of communication networks .

Network Expansion Context

This procurement is part of Kyrgyzstan's broader effort to enhance digital connectivity. Since early 2025, the country has laid over 3,900 kilometers of fiber-optic network, built 212 communication nodes, and deployed 30 backbone nodes, connecting nearly 3,882 facilities including schools, hospitals, and government institutions to high-speed Internet . These efforts are aligned with the government's digitalization initiatives, including the Tunduk JSC platform and mobile app, which provide citizens with access to 178 digital services, many fully automated
